OAKLAND NURSERIES

Experience Christmas with a Real Tree!

LIVE CHRISTMAS TREE CARE TIPS

Determine the planting location for the tree and dig the hole early in the month (while the ground is still workable). The hole should be twice as wide as the ball but no deeper.

Store the tree in an unheated room, such as a garage or back porch, for a minimum of 2-3 days before bringing it inside; this allows your tree to SLOWLY adjust to warmer temperatures.

As Christmas nears, bring your tree indoors. Keep it inside for 10 days or less. Keep it in a tub for ease of handling & watering.

Water as needed to keep the root ball moist. AVOID STANDING WATER!!!

After Christmas, store your tree in an unheated room again so it can adjust to cooler temperatures. Store for a minimum of 2-3 days.

Now it is time to plant! Place the tree in the prepared hole and back-fill with loosened soil. Check planting depth— top of root ball should be slightly higher than surrounding soil line. Water well!

SELECT FROM BIG or LITTLE TREES!

Premium Fresh Cut Christmas Trees

Select Firs **from \$10⁹⁹** Scotch Pine **from \$14⁹⁹**

Balsam Fir	3'-14' (\$10.99-\$199.00)
Fraser Fir	3'-14' (\$19.99-\$399.00)
Douglas Fir	6'-13' (\$39.99-\$399.00)
Scotch Pine	3'-8' (\$14.99-\$29.99)
White Pine	6'-8' (\$29.99)
Canaan Fir	3'-15' (\$14.99-\$249.00)
Concolor Fir	5'-12' (\$39.99-\$199.00)

CUT CHRISTMAS TREE CARE TIPS

Keep your tree outdoors or on an unheated porch or patio until you decide to take it in and decorate it. Keep it protected from the wind and sun also. More importantly, keep it in a pail of water or very wet sand until it goes inside.

Make a straight, fresh cut across the trunk about an inch or two from the bottom when you're ready to bring it in. This procedure opens the tree's "pores" so they can absorb water, much like cut flowers do.

Trees are thirsty! Keep your tree in a water bearing stand. Depending on size and species, Christmas trees can drink from two pints to a gallon of water per day. Fill your tree stand daily.

If you use electric lights for tree decoration, make sure all lights, wires, sockets, and plugs are in good condition!

Many sizes and colors to select from...

Gift wrapped just for you!

Poinsettia CARE TIPS

Moderately bright light is best, but poinsettias will tolerate low light.

Moderately moist soil is preferred. Water thoroughly when soil surface feels dry to the touch. Drain excess water in saucer at base of pot to prevent root rot and to protect furniture.

Moderate temperatures are ideal: 65-70°F daytime and 60-65°F night. Avoid excessively hot or cold areas.

Long-lasting poinsettias will benefit from periodic applications of fertilizer, used to manufacturer's directions.

KEY TIPS FOR SUCCESS: Bright light and cool night temperatures will help delay flower bud drop and will maintain brightly colored bracts.
